

## Extensions to **Event** – “When” in common

- <https://schema.org/Event>

You can submit a textual summary of these properties in `content`

defines things like

redaktor has an extensive context for Place and is extending it with the wikidata and OSM.

This is self declaring and has benefits:

- Common Knowledge (facts)
  - multilanguage labels
  - multilanguage descriptions / "summary"
  - multilanguage full text / "content" (wikitravel, wikivoyage, wikipedia, linked wikis)
  - Qualified statements and relations
- for our Atlas of 1.9 million organized Place ...

### **Note:**

The mobilizon use is documented in [docs.joinmobilizon.org/contribute/activity\\_pub](https://docs.joinmobilizon.org/contribute/activity_pub)
