1>

The Link properties include:

- href
- hreflang
- mediaType
- rel
- preview
- · height
- width
- name

Note:

A Link is an indirect, qualified reference to a resource identified by a URL. Many of the properties defined by the Activity Vocabulary allow values that are either instances of Object or Link.

When a Link is used. it

establishes a qualified relation connecting the subject (containing object) to the resource identified by the href.

Properties of the Link are properties of the reference as opposed to properties of the resource.

Viele der im Activity Vocabulary definierten Eigenschaften erlauben Werte, die entweder Instanzen von Object oder Link sind.

Wenn ein Link verwendet wird, stellt er eine qualifizierte Beziehung her, die das enthaltende Objekt mit der durch die href identifizierten Ressource verbindet.

Special Link types include:
