The properties for ActivityPub **Actors**

[recap]

actor reads
incoming messages

send messages
to actor (federation!)

GET | INBOX | POST | REST OF THE WORLD

POST | OUTBOX | GET |

actor sends
messages / posts content

outside world can read
messages from actor

What?

• You can POST to someone's inbox to send them a message (server-to-server – this is federation!)

• You can GET from your inbox to read your latest messages (client-to-server – like reading your social network stream)

• You can POST to your outbox to send messages to the world (client-to-server)

• You can GET from someone's outbox to see what messages they've posted (or at least the ones you're authorized to see). (client-to-server and/or server-to-server)

Must	Should	May
• inbox	• following	• liked
• outbox	• followers	• streams
		• preferredUsername
		• endpoints:
		e.g. • sharedInbox
